

SECTION - 2: SOCIO-ECONOMIC CHARACTERISTICS

The data relating to different socio-economic aspects of rural people have been covered in this section viz., Net Domestic Product by Economic Activity, Rural and Urban Incomes, Work Force, Occupation-wise number of Workers, Labour Force Estimates, Migration Details, Literacy Rates, Employment and Unemployment Estimates and Incidence of Poverty. State-wise data are furnished for the recent years.

- 2.1: Time-series data (from 1950–51 to 2015–16) on the Gross National Product , Net National Product and also the Per Capita Net National Product both at current and constant prices are shown.
- 2.2: The percentage contribution of different “industry” groups to Gross Value Added for the period 2011-12 to 2014-15 are presented at constant prices in this Table.
- 2.3: The Net Domestic Product (NDP) industry-wise for rural and urban areas as worked out by CSO for a few selected years are shown.
- 2.4: Data on Net State Domestic Product State-wise at current prices for some selected years i.e 2006-07 to 2014–15 are furnished.
- 2.5: Growth rates of Net State Domestic Product State-wise at current prices for some selected years i.e. 2005-06 to 2014–15 are presented.
- 2.6: This Table provides the per capita Net State Domestic Product figures at current prices for selected years during the period 2004-05 to 2014–15.
- 2.7: Growth rates of Net State Domestic Product State-wise at current prices for some selected years i.e. 2005-06 to 2014–15 are presented.
- 2.8: This Table presents the per capita Net State Domestic Product values at constant prices (2004-05) for selected years during the period 2006-07 to 2013-14.
- 2.9: Rates of Growth of SDP by major States for Eighth, Ninth, Tenth and Eleventh Plan periods are shown.
- 2.10: Target growth rates of GDP by major industry at factor cost for Eleventh and Twelfth Five Year Plans State-wise are presented.
- 2.11: Growth Rate in Gross Value Added (GVA) at Basic Prices for Different Sectors are presented.
- 2.12: Annual Growth Rate of GDP Industry-wise at Origin at Constant Prices (2004-05) is presented in this table.
- 2.13 & 2.14: These Tables contain data on population figures and labour force growth for some selected years.
- 2.15 (a & b): Estimates of Rural Labour force Participation Rates sex-wise for different NSS rounds are shown.
- 2.16 (a, b & c): The data on distribution of rural workers by major occupation in 2001 and 2011 State-wise and All India-wise are presented in these Tables.

36 Rural Development Statistics

- 2.17, 2.17 (a) & 2.18: Labour force participation rate for all persons and for persons in age group of 15-59 years by Usual Principal Status, Principal Status & Subsidiary Status, Current Weekly Status and Current Daily Status for the year 2011-12 are presented in these Tables.
- 2.19 to 2.27 The National Sample Survey Organisation (NSSO) collects data on Employment and Unemployment periodically. The estimates thrown up by the NSSO on the employment and unemployment rates are based on the three approaches viz., usual status approach, current weekly status approach, and current daily status approach. The estimates of number of workers, unemployed and persons out of labour force as developed by National Sample Survey Organisation for different States in different NSS Rounds are included in these Tables following the three approaches for both males and females separately.
- 2.28 (a to e): Sex-wise literacy rates as per population census in rural and urban areas for the years 1951, 1961, 1971, 1981, 1991, 2001 and 2011 are shown.
- 2.29: The literacy rates of the rural population aged 7 years and above (sex-wise) in different States and UTs according to 2001 and 2011 censuses are provided.
- 2.30: State-wise and Sex-wise literacy levels in each State and UT for the year 2001 and 2011 are given.
- 2.31: Percentage distribution of indebted rural labour households by purpose-wise in 2004-05 is presented. Incidence of indebtedness to institutional and non-institutional credit agencies by household asset holding class – All –India 2012.
- 2.32 to 2.35 (a & b): Migration rates obtained from different NSS rounds are presented.
- 2.36, 2.36 (a & b): Percentage distribution of indebted rural labour households by purpose-wise 2004-05 is presented. Incidence of indebtedness to institutional and non-institutional credit agencies by household asset holding class – All –India 2012.
- 2.37: Percentage distribution of indebted rural labour households by source of debt (2004-05) is shown.
- 2.38: The estimates of number of rural households, farmer households and indebted farmer households in the States and UTs are presented for the year 2003.
- 2.39: Incidence of indebtedness among rural labour households for 2004-05 is presented.
- 2.40: Extent of indebtedness among rural labour households 2004-05 is presented.
- 2.41: Daily rates of minimum wages for agricultural workers for 2014 are included.
- 2.42: Average wage/ salary earnings per day received by casual labourer of age 15-59 years engaged in public works other than MGNREGS public works for the year 2009-10 are presented.
- 2.43: The average quantity and value of cereals consumed for the years 1987-88 to 2009-10 are presented.

- 2.44: Monthly per capita consumer expenditure on food and non-food items of the rural households during July 2011 – June 2012 in different States are shown.
- 2.45: Data on monthly per capita consumer expenditure on cereals for the year 2009-10 are included for major States-rural.
- Data on Average Consumer Expenditure per Person in MPCE different Decile Classes of 2011-12 is shown. Share of Consumer Expenditure for Different Fractile Classes of 2011-12 are presented.
- 2.46 (a & b): Monthly average quantity and value of consumption of different cereals per person in 2009-10 are shown in these Tables.
- 2.47: Data on per capita cereal consumption in major States are presented for different NSSO rounds.
- 2.48: This Table shows the Lorenz ratios of consumption expenditure distribution of population in States / UTs for 2009-10.
- 2.49: State-wise consumer price indices for “Food” and “General” items in the case of Agricultural Labourers for selected years are presented.
- 2.50 (a & b): The official estimates as per Tendulkar and Rangarajan methodology on incidence of poverty are included in these Tables both for rural and urban areas and for specific years (1983, 1993-94, 2009-10 & 2011-12).
- 2.51 (a, b & c): State-specific Poverty Lines (₹ per month per capita) relating to the rural areas of different States and UTs for the years 1973-74, 1983, 1993-94, 1999-2000, 2004-05, 2009-10 and 2011-12 are furnished.
- 2.52: These Tables provide data on the absolute number of poor and poverty ratios in rural, urban and combined areas of each State/UT for the years 2004-05, 2009-10 & 2011-12.
- 2.53 to 2.56: The Table contains State-wise values and ranks on Human Development Index (HDI).
- 2.57: Distribution of number of members seeking / available for work in rural areas for 2001 by age groups-wise is presented in these Tables.
- 2.58: Distribution of households classified according to the availability of two square meals a day in the rural and urban parts of the country is given.
- 2.59: Distribution of households by household type and according to the availability of two square meals a day in the rural areas is presented in the Table.

Highlights

- During the period 2005-06 to 2015-16, Indian economy grew at an impressive rate and even the per capita income registered a growth rate over 2.7 times in constant prices.
- The share of agriculture in NDP has been declining at the rate of one per cent per annum in the recent years (at 1999-2000 prices). The share of rural areas in NDP has fallen from 59 and to 48 per cent in 24 years period ending 2004-05. The agriculture growth rate has been still lagging behind the target growth rate of 4 per cent.
- The rural-urban differences in per capita NDP have widened during 1980-81 to 2004-05.
- The rural labour force has been declining partly due to migration of workers to urban areas and also due to increased participation of youth in education. The percentage of cultivators among workers was high in the major States of Chhattisgarh, Himachal Pradesh, Jammu & Kashmir, Madhya Pradesh and Rajasthan. The casualisation of labour is still a significant phenomenon in rural areas. The dependency of workforce on agriculture has reduced for male workers but not for female workers. The number of employed has gone up by 40 millions in two decades ending 2004-05 i.e at the rate of 2 millions per annum. It is disheartening to note that 92 per cent of workforce is engaged in informal sector. The unemployment levels in rural India still hover around 8 per cent.
- The rural-urban and gender differences are conspicuous in literacy levels even while the levels have been rising.
- The rural-rural, intra-State and female migration are the dominant streams of migration in India. The employment related factors are responsible for migration of males while marriage is driving force in respect of females. As per NSSO data, migration rates have been rising in rural India.
- Nearly 50 per cent of the Indian farmers are indebted and average debt is of the order of ₹ 12585 for 2003. In Bihar, Himachal Pradesh, Jammu & Kashmir and Jharkhand, almost 70 to 80 per cent did not have access to credit facility at all; similar is the situation in the North-East. Average outstanding loan per farmer was high in Punjab, Kerala, Haryana, Andhra Pradesh and Tamil Nadu. Around three-fifths of indebted farmers were marginal farmers. Money lenders' share in outstanding loans was one-fourth while banks account for more than one-third of the debt. The indebtedness was one of the main reasons for farmers' suicides in India and suicide rate was about 1.55 per lakh farmers in 2005.
- The agricultural wages have gone up during the recent years largely due to MGNREGS.
- The gini coefficient of inequality in consumption expenditure has gone up during the last three decades. Also the share of bottom 30 per cent population remained more or less stable in most of the States and it varied between 13 and 19 per cent. The average consumption of cereals, the principal source of calories, has been declining over the years. Further, the share of food in total consumption expenditure at the aggregate level was almost 50 per cent. These together indicate that poverty levels in rural India are high. While official estimates of rural poverty was 28 per cent in 2004-05, the Tendulkar Committee places it at 42 per cent. However, inequality among the poor has reduced.

Note:

1. Population as on 1st March 2012 has been used for estimating number of persons below poverty line (2011 Census population extrapolated).
2. Poverty Line Tamil Nadu has been used for Andaman and Nicobar Island.
3. Urban Poverty Line of Punjab has been used for both rural and urban areas of Chandigarh.
4. Poverty Line of Maharashtra has been used for Dadra and Nagar Haveli.
5. Poverty Line of Goa has been used for Daman and Diu.
6. Poverty Line of Kerala has been used for Lakshadweep.
