**Online Training on
'Integrating WASH Elements into GPDP'**
(Integrating Elements of JJM and SBM-G into GPDP)
(26 – 30 July, 2021)

Need

The National Jal Jeevan Mission and the SBM-G Phase-II are two flagship programmes of the Government of India. With the mandate of spending 60% of the XV Finance Commission Funds on water and sanitation components – besides spending the regular allocation states get under the SBM-G and JJM - is a great opportunity for the local bodies to prepare and implement a robust plan that can ensure *sustainable water and sanitation for all*. In order to fulfil this ambition, a prime requisite is that every Gram Panchayat has to prepare Gram Panchayats Development Plan (GPDP) integrating all the essential components of WASH. In doing this exercise, the challenges are many. They include (i) identifying various components of water, sanitation and hygiene in the context of a Gram Panchayat; (ii) prioritizing to be able to have a perspective plan, and annual action plans; and (iii) looking into the programme convergence possibilities so as to access the sources of funds for implementation etc. This training programme aims at providing the technicalities, and the guidance required to be able to integrate WASH elements into GPDP. The clientele groups targeted are officials working in the District and Block level Water and Sanitation Mission. The officers working in RWSS Department, PHED and at RD&PR Department in charge water, sanitation and MGNREGS.

Objectives

- To introduce the GPDP Framework and the components of WASH covered in the Jal Jeevan Mission, and SBM-G Phase – II
- To refresh on the implications of XV FC recommendations on water, sanitation, hygiene and health within the institutional framework of PRIs
- To demonstrate ways to prepare a comprehensive GPDP focusing on WASH components, and scheme convergence possibilities.
- To discuss ways to motivate the Gram Panchayats to prepare quality GPDP with proper perspective plan and annual plan encompassing all WASH components.

Contents

- Integration of Jal Jeevan Mission into the framework of GPDP
- The Place of Water and Sanitation under the XV Finance Commission
- Community Mobilization for preparation of a robust WASH plan
- The conceptual and legal elements of rural water supply management
- Potential GIS and IoT Applications in Water Supply & wastewater management
- Planning for Solid Waste Management at GP level
- Planning for Wastewater Management & Technologies for wastewater reuse
- Management of Community Sanitary Complex and Institutional Latrines
- Village Action Plan for Water Supply & Village Swachhata Plan

- Scheme convergence and source sustainability measures
- Management Models and Financing Mechanisms
- Professionalization of Rural Water Supply & Sanitation Services at GP level
- Sustainable O & M of water and sanitation services

- **Training Methods**

It will be on-line training using Webex platform. There will be PowerPoint Presentations, Video shows, and experience sharing sessions on good practices. Case presentations and experience sharing arranged from successful Gram Panchayats / Officers.

- **Participants Level**

The training is for the district and block level coordinators, working for Rural Water Supply Department, RD&PR, PHEDs who have the responsibility of training grassroots level facilitators, or guide the Gram Panchayats or local teams that are involved in preparing GPDP / Village Action Plan / Swachhata Action Plan for water and sanitation services. The participants can draw ideas from this course to customise them to the context of one's own state. This programme is being designed bearing in view the concepts and functional strategies of JJM and SBM-G. Thus, some local NGOs working as Institutional Support Agencies (ISAs) / KRCs of Jal Jeevan Mission (JJM) are also invited to register.

- **What do you get?**

- The idea of GPDP with specific reference to water and sanitation services, and the role of XV FC funds in water and sanitation
- Solid waste management
- Wastewater management
- Management of sanitary complex and Institutional latrines
- Scheme convergence possibilities for water and sanitation
- The potential application of GIS and IoT application in RWS
- Engaging third party agencies for managing WASH services at GP level
- Service Level Benchmarks for RWS, and monitoring indicators
- Management models and Financing mechanisms
- Issues of sustainable Operation and Maintenance of WASH facilities

- **Duration** : **5 days** (26 to 30 July, 2021)

3 hours daily (10.00 am to 1.00 pm)

- **Platform** : Webex (link will be sent once you register with your mail ID)

- Please fill in the simple Registration form below and click submit:
