Editorial

Dear Readers,

Construction of RSETI buildings – Minimum requirements

It is heartening to note that construction of the RSETI building has picked up during the year 2015-16. It is evident from the request we are receiving for the release of second instalments. With this pace of construction we are confident that by the end of financial year 2016-17 proper infrastructure will be in place at most of the locations. Before release of second instalment physical verification of construction status is mandatory. Accordingly PD RSETI or PM RSETI does visit the construction site. Some of the general observations/ suggestions are as follows:

- ☉ The site / land should be demarcated and wire fenced, if no boundary wall.
- ☉ The minimum covered area required is 8000 sq. fts.
- ☉ Ramp at the main entrance should be with proper inclination and should have railing support.
- ☉ Director room should be spacious & should have attached wash room.
- ☉ There should be minimum 2 class rooms which can accommodate 40 participants.
- ☉ One of the workshops is to be converted into computer lab with required number of power points & concealed wiring.
- ☉ There should be separate passage for male & female dormitories or blockage between them to curb/prevent visibility.
- ☉ The dormitories should have attached wash rooms/toilets.
- ☉ The number of toilets/bath rooms in dormitories should not be less than 4 to avoid morning inconvenience.
- ☉ Provisions for wash basins for hand wash & water cooler are to be made in the dining hall.
- ☉ There must be a small store room attached to the kitchen with shelves for proper storage.
- ☉ There should be provision for washing area outside kitchen for washing of kitchen utensils.
- ☉ Provision for 2 guest rooms for guest/ visiting faculties should be there.

It is requested that all the banks/ RSETIs may take note of above & ensure the same.
