FOREWORD

This issue, 27th in the series, of Rural Development Statistics is an annual publication of the Institute. The publication presents State-wise data on a host of parameters concerning various facets of rural development. In addition, the allocations of the Ministry of Rural Development on its various programmes and schemes are given. For issues including poverty, estimates based on different Committees for different time points are presented facilitating both temporal and spatial comparisons. The highlights of each section are given briefly before each section.

In addition to the usual sections, the present issue includes two new sections viz., Socio-Economic Caste Census and Minor Irrigation Census.

The sources for the data contained in this publication are mostly annual reports of various Ministries concerned, Government websites and data we received from different agencies on our request. We are grateful to such agencies.

This issue consists of 300 tables spread over 14 sections. The reference year for compilation of data is mostly 2014-15 and 2015-16.

We expect that this publication would continue to be useful to various academicians, programme implementing agencies and Non-Governmental Organisations concerned with rural development.

We welcome any suggestions towards further improving the quality of this publication.
